

## *Shear Care Basics*

### **Clean & Oil Shears After Each Day's Use**

Use a brush to clean the pivot area.

Add one drop of quality shear oil to the pivot area.

Avoiding the edge, **SLOWLY & CAREFULLY** wipe clean.

### **Check Adjustment Weekly**

With blades fully open and positioned to fall closed,

The handle should just begin to fall but not close on its own.

### **Keep Shears Closed and Protected When Not In Use**

Closed shears are protected shears. Protects the edge naturally.

Closed shears are safer to handle. Keep shears stored in a case.

### **Every 3-6 Months Get Professionally Serviced by Lucky Hare Shears**

Assures returning shears nearest to factory new specifications.

Unskilled servicing will severely damage and

Unnecessarily takes years off the life of the shears.

**Inquire about Lucky Hare's Shear Care Kit that includes  
shear brush, shear oil, & microfiber polishing cloth.**
